

People are suffering from Alzheimer's Disease and Dementia

People need access to diagnosis and assessment services

There are not enough specialists to provide the services

ECHO[®] trains primary care clinicians to provide evidence-based diagnoses

Patients and caregivers get comprehensive care plans and support services

What is Project ECHO for Alzheimer's Disease and Dementia Program?

Project ECHO is a **free tele-mentoring program** that provides training in Alzheimer's disease and Dementia treatment to community providers. **Videoconferencing (Zoom)** will be used to deliver:

- **Practical didactics** on Alzheimer's Disease and Dementia Treatment
- **Case discussions** using cases that participants submit
- **Support from peers and experts** within and outside of Montefiore
- **Free CME credits** for physicians, nurse practitioners, and physician assistants

What is the time commitment?

- Sessions are held on the **2nd Tuesday of each month from 8AM – 9AM.**
- The first session took place on **October 9, 2018.**

How do I participate?

You must register to participate and receive information on how to:

- Set up Zoom videoconference on your computer or smartphone
- Submit patient cases using the case presentation form

To register, contact:
