

Course: NYS Screening, Brief Intervention and Referral to Treatment (SBIRT)

Montefiore Hudson Valley Collaborative (MHVC) is introducing an instructor-led training on SBIRT. Screening, Brief intervention, and Referral to treatment (SBIRT). SBIRT is a comprehensive, integrated, public health approach that provides opportunities for early intervention before more severe consequences occur. Evidence-based tools that are demonstrated to be valid and reliable in identifying individuals with problem use or at risk for a Substance Use Disorder (SUD) must be used. This training is part of MHVC’s cross project training strategy to help build patient-centered self-management support skills and is beneficial to social work practice.

About This Training

At the end of the training, the learner will be knowledgeable of the following:

- What Is SBIRT and Why Use It?
- How SBIRT fits into Public Health.
- Screening for Substance Use
- Brief Intervention and Essential Motivational Interviewing Skills
- Brief Negotiated Interview
- Referral to Treatment
- The Business of SBIRT

Who Should Attend

- Healthcare professionals in partner organizations looking to implement SBIRT in their practice.
- Mental health providers including social workers who provide direct service, supervision, and administrative oversight

How does SBIRT work?

- SBIRT incorporates screening for all types of substance use with brief, tailored feedback and advice.
- SBIRT can be performed in a variety of settings. Screening does not have to be performed by a physician.
- Simple feedback on risky behavior can be one of the most important influences on patient behavior and change.

[CLICK HERE](#) for an SBIRT introductory video from the NYS Office of Alcoholism and Substance Abuse Services.

By attending this training, licensed providers will be able to bill for these services.
