

Job Title: Stakeholder Engagement and Reporting Director

About the Montefiore Hudson Valley Collaborative (MHVC):

The Montefiore Hudson Valley Collaborative (MHVC) is a Performing Provider System (PPS) in the New York State Department of Health's Delivery System Reform Incentive Payment Program (DSRIP). MHVC is comprised of a group of over 200 partnering healthcare organizations, who have come together to improve healthcare across the Hudson Valley through the development of an integrated delivery system. Working together, we are championing new models of providing Medicaid beneficiaries with higher quality care, while reducing expenditures through enhanced care coordination, community-focused care and education.

The HEALing Communities Study will generate evidence about how tools for preventing and treating opioid addiction are most effective at the local level. This NIDA funded multisite implementation research study will test the impact of an integrated set of evidence-based interventions across healthcare, behavioral health, justice, and other community-based settings in 16 New York State highly affected counties. The goal is to prevent and treat opioid misuse and opioid use disorder (OUD) and reduce opioid related deaths by 40 percent over three years.

Job Title: Stakeholder Engagement and Reporting Director

We are seeking a public health professional with the ability to independently engage diverse stakeholders and design, coordinate and operationalize complex projects. The Stakeholder Engagement and Reporting Director will work directly with county commissioners and staff to plan, institute, facilitate and evaluate network-building, staff-development and change management efforts within the Healing Communities Study (HSC). This role will report to the MHVC Medical Director and coordinate closely with a team of researchers from multiple institutions. The role will provide direct support and mentorship, as needed, to 16 local county Community Engagement Coordinators in their efforts to develop organizational champions and troubleshoot implementation of Evidence Based Interventions at the county level. The individual will also facilitate intervention co-design processes that incorporate patient/family voice and deliver change management curriculum and coaching to support development of change management capacity locally. The role will also operationalize and facilitate a "Virtual Collaboration" platform for community engagement across the 16 counties and build and manage social media engagement strategies and platforms.

This individual will have a master's degree in public health (or equivalent) plus 4-7 years of experience working in health care delivery research and/or administration and project management and grant experience. The Stakeholder Engagement and Reporting Director must have strong verbal and written communication skills and will be responsible for writing manuscripts for required reports and academic publications, preparing and delivering conference presentations and supporting and developing new grant applications and project protocols.
